Technologies

Programming Languages

C/C++ | JS/TS | Python | Rust

Frameworks/Libraries

Arduino | ROS | React | ThreeJS

Tools

Linux | Docker | Wireshark

Languages

Bulgarian	Native
English	C2
Dutch	
German	B2
French	
Spanish	
Italian	
Portuguese	

About me

- Final-year ICT student at Fontys
- Software and embedded systems
- 5+ years of industry experience through internships, work, and independent projects
- Strong Linux background with an active interest in cyber security.

Experience

February 2026 - July 2026

RoboCup@Home

Currently working on a robotics challenge involving a moving base and a robotic arm (LeRobot) with ROS and MoveIt

ROS | MoveIt | C++ | Python

February 2025 - November 2025

Glow

Contributed to two student teams for one of the biggest light festivals in the Netherlands:

- Echoes of Tomorrow - prototyping and design
- Phoenix - construction and spotlights programming

Python | Spotlights

September 2024 - February 2025

ASML Internship

Created an internal code analysis tool with an interactive visualizer from scratch

C++ | JS | HTML | CSS

April 2024 - June 2024 / April 2025 - June 2025

Sustainable Development Goals Challenge

Participated twice in the SDG Challenge organized by Soapbox

- SABIC (2024) - Made a game style recycling system with a hardware prototype for the second larget plastic producer in the world
- Solarwatt (2025) - Co-developed a transparency education platform for a solar panel leader in Germany and the Netherlands

C++ | Arduino | TS | React | Next | Vercel

January 2022 - present

Latin is Simple

Developed a latin vocabulary and grammar trainer similar to Duolingo with advanced generated questions

TS | React | Bootstrap | Jest

Soft skills

Eager to learn • Curious
Open-minded • Ambitious
Determined • Valuing quality

Senne van Ruiter
- Teacher at Fontys
- s.deruiter@fontys.nl

July 2021 - October 2021

A1 Telecom Austria Group - Internship

My first entry in the software industry as a junior developer in the "ICT Projects and Software Development Services Team"

React | Express | GraphQL | Docker

Education

Sep 2025 – February 2026

Technical University of Eindhoven

- Embedded Systems pre-master
  - Circuits, systems engineering, mathematics

Sep 2022 – present

Fontys University of Applied Sciences

- Information & Communication Technology
  - Accelerated Software (Academic preparation)
  - Open Learning

Sep 2017 – May 2022

Second English Language High School "Thomas Jefferson"- Sofia

- Profile: English, German, Mathematics and IT

Expertise

Embedded Systems

- Developed several personal projects using microcontrollers like Arduino, working on sensors, actuators, and hardware-software interaction. I'm currently doing the "High-Tech Embedded Systems" advanced semester at Fontys.

Robotics

- Contributing to a RoboCup robotic arm project, focusing on the embedded systems that control its movement and behavior.

Web development

- Full-stack development has been a significant part of my career, building complete applications from backend logic to interactive front-end interfaces, including 3D web experiences with ThreeJS.

Cybersecurity

- Gained practical experience through Hack The Box, CTFs and security challenges, including Mine the Matrix and TrojanCTF, and have developed a few challenges myself to deepen my understanding of offensive security.

Linux

- Extensive experience using Linux for both personal and professional projects across NixOS, Ubuntu, Fedora, and Arch, including development, debugging, and system setup.
